NATIONAL HIGHWAY TRAFFIC SAFETY ADMINISTRATION

GO Teams, Toolkit, & Traffic Facts Update

Tom Bragan

9/19/2019

Overview

GO Team Technical Assistance – First Tribal GO Team wrapping up work this month

Tribal Crash Reporting Toolkit – just begun

Native American Traffic Safety Facts – recently updated

GO Teams are . . .

- Technical assistance to help Tribes address a specific, identified crash data need
- Assistance is provided by 1-3 subject matter experts
- Free to Tribes
- For Real and happening now! First GO Team was deployed to develop data sharing agreements

Other possible GO Team objectives:

- Problem ID and countermeasure development
- Developing a strategic plan and performance measures
- Data integration

- Providing Tribes with a set of tools and guidance to help them make better use of their crash data
- The core of toolkit is the Crash Form and Crash Database

Other Tools in the Kit

- Three guidance documents:
 - Police Instruction Tool
 - Data Analysis Tool
 - Quality Control Tool
- Crash Data Facts & Fiction Tool
- Toolkit Manual: describing the other six tools

Toolkit Timeline Highlights

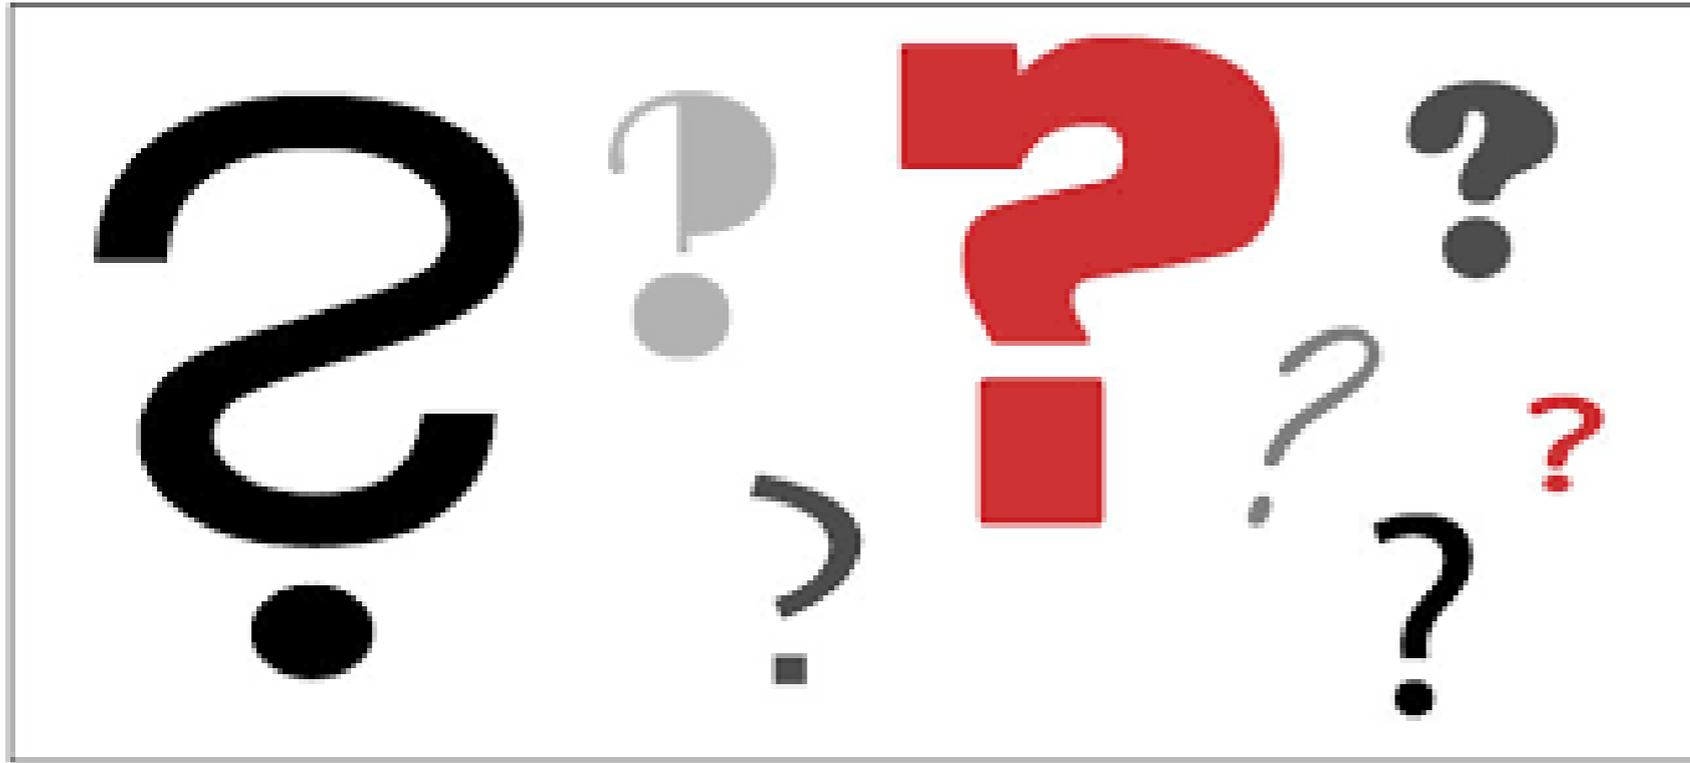

- August 7: Project kick off
- **October 2:** Initial draft of the Crash Data Facts & Fiction Tool is due &
 - **Contractor will begin consulting with pilot Tribes**

April 2020: Demonstration of electronic Crash Tool

June 2020: Demo of Database Tool

August 2020: Toolkit finalized, project closeout webinar

- Fatality Analysis Reporting System (FARS) data supplemented with DOI shape files to better identify Tribal lands
- https://cdan.nhtsa.gov/NA_report/NA_Report.htm
- Crash information added: Person type, BAC test result, EMS info, etc.
 - What information would you like to see?

**Possibly interested
in helping to pilot
one or more Tools?**
